VITEN

Our Vision International Resource Centers program allows you to adapt the training to your community and ministry context.

One of the greatest expressed needs of international leaders, second to a bible in their own language, is training and education. The Vision International Resource Centers Program provides to Pastors and other Spiritual leaders the tools to effectively equip God's people, and develop leaders and church planters for their nations and beyond.

- Over 100 complete courses, with textbooks, study guides, exams, lecture notes, for beginning discipleship through Doctoral Degree Studies. We also provide...
- Library resources, sermons, teaching notes, commentaries and other resources, heretofore unavailable to the International leader.
- With the resources comes an administrative system for starting a training center, and permission to contextualize, translate and distribute in native languages.
